Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Statistics of Freight Traffic Modern railway transportation in the United States may be classified roughly under three heads: 1. Transportation of merchandise and other goods by freight train. 2. Transportation of passengers. 3. Incidental duties undertaken in connection with the principal branches of transportation work among others the transfer of small parcels by express, the transportation of personal baggage of passengers under the checking privilege, and the carriage of the federal mails. To a casual observer the passenger business of the railways probably appears the most important part of their many functions. Passenger trains are the only trains to appear at our great terminal stations; the passenger business is most extensively advertised throughout the newspapers and periodicals of the United States; recent legislative regulation of railways has appealed perhaps more strongly to the public in their capacity as railway travelers than as shippers of freight. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy.
