Practical Lessons in Fractions: By the Inductive Method Accompanied by Fraction Cards (Classic Reprint)

By Florence N Sloane

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Practical Lessons in Fractions: By the Inductive Method Accompanied by Fraction Cards The children in the third-year grade of the primary school are expected to answer such questions as, $\frac{3}{4}$ of \$28 = ? of 40 apples = ? of 56 peaches = ? etc. There are ways by which the child can be taught to obtain answers to such questions, without his gaining any idea of what fractions really are. He can learn that because $2 \times 4 = 8$, that $\frac{1}{4}$ of 8 is 2; and 4 times 3 being 12, that $\frac{1}{4}$ of 12 is 3; and as 4 times 7 are 28, $\frac{1}{4}$ of 28 is 7. Then, as $\frac{3}{4}$ of 28 is asked, he takes 7 three times. Yet, if you were to ask him which is the larger, $\frac{1}{4}$ or, he would in most cases answer, because 5 is larger than 4. This plan works quite well with certain children, while with others who are slower, it does not. Again, if the child does not know his tables, or...
