This book looks at how and why varicose veins arise, and what can be done both in terms of self-help and medical treatment. Subjects covered in this book include: causes and risk factors - obesity, chronic cough, chronic constipation, thrombophlebitis; complications and links to other conditions - kidney disease, deep vein thrombosis; pregnancy; treatment - surgery; treatment - modern, minimally invasive procedures; maintaining a healthy weight and sensible diet, including fibre and fresh produce; the importance of regular exercise; what to avoid - ie sitting or standing for long periods, tight clothing; and, myths.
